adapted from an NSWA GIS map

STURGEON SUBWATERSHED

- Located 40 minutes west of Edmonton, Alberta.

About LILSA

- Non-profit society lake stewardship group since 2013
- The members and volunteer executive of LILSA are regular people like you, who are concerned about our lakes.
- Meetings occur once a month to discuss issues, projects and opportunities
- Upcoming AGM (Aug 20th @ 9 AM – Alberta Beach Agliplex)

Main Concerns

- Water Levels
 - Water Quality (Blue-Green Algae)
 - Invasive Species
- Flowering Rush (*Butomus umbellatus*)
Provincial Designation: Prohibited Noxious

A scenic view of a river with reeds and trees, featuring the text "Thank you!" overlaid in a white cursive font. The river is calm, reflecting the sky and the surrounding greenery. In the foreground, several long, brown reeds are visible, some partially submerged in the water. The background shows a dense line of trees and bushes along the riverbank under a blue sky with scattered white clouds.

Thank you!
